Physical Education](#)

INVITATION

Dear colleagues!

We are pleased to invite you to the:

3rd ANNUAL INTERNATIONAL CONFERENCE: PHYSICAL EDUCATION, SPORT AND HEALTH, PITEȘTI, 19th – 20th OF NOVEMBER 2010

Aim :

“Physical Education, Sport and Health” is an Annual International Conference that focuses on Physical Education, health behaviors, nutrition, education, cultural and social dynamics, academic achievement and other topics regarding the sport field. Sport plays an important role in human life, improving

people’ health and personal growth and also offering the opportunity to experience fun, exercise and to spend time in a pleasant manner. Physical Education and sport are activities with national interest, supported by the Romanian state and included in the scholar curriculum as a necessary branch of science. Many scientific studies revealed and sustained the prophylactic and therapeutic role of sport. It is well known the fact that the physical activity may prevent or delay the onset of diseases and, at the same time, it is used with great results in their treatment and rehabilitation. Starting from this point of view we want to offer a framework that allows people who are involved in research or in the practice of physical activities and in sport performances to find out the most recent news in this field.

The International Conference entitled “*Physical Education, Sport and Health*” will take place on the 19th-20th of November 2010 in Pitești, Romania. The main objective of this International Conference is to reunite specialists from different fields, such as sport, physical activity, kinesitherapy, education, health and nutrition, in order to provide the opportunity of multidisciplinary debates and comprehensive understanding of how physical activity influences human life. Researchers from areas related to sport and health will be invited to present their newest gathered information and its practical applicability. Having participants with various cultural backgrounds promotes intercultural and experience exchange, together with sharing ideas and spreading the latest knowledge among the scientific world. The target group of the event involves specialists from different fields, such as: academic researchers, kinesitherapists, Physical Education and sport teachers, physicians in sports medicine, psychologists, nutritionists, coaches or any other specialists related to the sport domain.
