WELCOME TO SPLIT, CROATIA TO THE 16th ISHPES CONGRESS

Dear Friends and Colleagues,

On behalf of the host, the Croatian Society for Sport History and the Conference Organizing Committee, we announce with great pleasure the upcoming 16th ISHPES CONGRESS to be held in Split, Croatia, from 18 to 22 of August 2015, under the patronage of the International Society for the History of Physical Education and Sport.

World class keynote speakers, plenary and parallel sessions, joint events, great hospitality, lots of sun and crystal clear sea are the things that you can expect if you come to the ancient city of Split. We expect an extensive scientific program, lots of networking opportunities, many workshops and exhibitions. The social program and less formal events will not be forgotten either.

Young scholars and students are particularly welcomed because we consider this event as an excellent platform and chance for them to meet, talk and discuss with some of the world's leading experts in the field of sport history.

We are looking forward to welcoming you at the Congress!

HOST CITY

Split is a cultural, tourist, and commercial center of Dalmatia. Split is also the second biggest city of Croatia. Its central location, mild climate and unique cultural treasures are a great attraction. The most famous monument in Split is Diocletian's Palace, which is on the world heritage list of UNESCO. This city was of no importance during Greek and Roman times, probably it would have remained so if the native Diocletian who rose from soldier to Roman emperor had not chosen the city as the site for his palace. The promenade, the railway station and the bus station are all situated next to each other at the beginning of the seaside alley of palms. This is the central part of the city where the palace, which was built of white stone from Brock Island, and Italian and Greek marble hides behind 66 foot high town walls not far from here. When the 430 square foot group of palaces was erected neither the town walls nor the houses attached to it existed.

You just walk slowly, pondering the zigzag streets paved with heavy stones inherited from ancient times and watch the extravaganza of houses all in a heap built among crumbling gray walls of the enormous palace, the place inhabited by thousands of people even today.

The past was actually lost in the mists of time in these streets and alleys. Among these people who lived their everyday life here, inside the marble walls, there's simply no sign of the echo of distance. No engraving can be seen and there's no trace of the presence of old rulers. A new life has begun between the old walls. The 21st century throbs in the shade of the palace.
