SUMMER SCHOOL 2018 IN VIERUMÄKI
INNOVATING FUTURE SPORT SERVICES - DEVELOPING PEDAGOGICAL THINKING, 10 ETC
JULY 16 - AUGUST 5, 2018

Haaga-Helia
Summer School 2018 in Vierumäki

We want to bring out our learning-methods for all who are interested in learning by innovating, doing and observing. Intensive Summer School have been designed to challenge and inspire you in your sports studies!

Haaga-Helia studies are process-oriented and give the students an excellent combination of hands-on skills along with a strong theoretical knowledge base. Vierumäki pedagogy is all about innovating, doing and observing in real-life working projects. As a pedagogical foundation, students play an active role. In this active environment students are constantly challenged to review their knowledge and to generate new creative solutions for problems. There are barely any traditional lectures. Study methods used are information retrieval, data processing and analyzing. Theories are tested in practice and outcomes and experiences are reflected with each other’s. Vierumäki campus is unique environment with strong community spirit.

Methods for learning in summer school are observing, doing and innovating

• Observing: You’ll have a chance to observe other participants way of working. You’ll be observing Vierumäkis sports instructors at their work and participate to some of the 12th P.E. Seminar lessons.

• Doing: You’ll organize a sport event in Vierumäki, work with Vierumäkis sports instructors and sport management students from other countries. You’ll also be a part of the P.E. Seminar organizer group.

• Innovating: You’ll create a new innovative sport event that will be held in Vierumäki. You’ll develop, and create innovative sport products based on your own experience and new knowledge.

HAAGA-HELIA SUMMER SCHOOL PROGRAMME (10 CREDITS)

The assessment of the course is based on student’s participation in contact sessions and successful completion of learning assignments. The programme consists of:

Development of pedagogical thinking 5 cr

• The overall objective is to provide student’s competency in the field of various pedagogical solutions. The student is able to use these pedagogical solutions in real-life situations.

• The student is able to adapt various pedagogical solutions to achieve goals and objects.

Creating sport products and events with innovative and user oriented approach 5 cr

• The student can seek and analyze information. He/She will learn to develop sport products and events in a real-life working environment while maintaining user oriented methods.

• The student will learn exploratory learning methods and is able to develop him/herself and his/her working environment by this method.
